TO: S & W Ammunition Distributors

ATTENTION: Ammunition Buyers

SUBJECT: 1975 S & W Ammunition Terms of Sale

Gentlemen:

Enclosed is our Distributor Net Price List quoting delivered prices on "Smith & Wesson" brand loaded center fire pistol and revolver, center fire rifle, and rim fire cartridges. The Federal Excise Tax of 11% has been included in these prices. Further details are provided under the Drop Ship Program.

Price Policy

The prices, terms, and other conditions of sale mentioned in this letter are subject to change without notice, and any new prices and terms which we may announce hereafter will apply to any unshipped portion of your orders on file with us at the date of such change.

Terms

Regular Terms:

All remittances for ammunition products purchased shall be made on the following basis:

Invoice Date	Discount Date	Net
1st to 15th inclusive	2% 25th same month	10th prox.
16th to end of month	2% 10th prox.	20th, 30th, or 31st prox.

TRADE MARK REG. U.S. PAT. OFF.

THE MARK OF QUALITY

Dating Terms:
Dating terms are applicable on all stock orders of loaded ammunition with firm specifications received and accepted by us after January 2, 1975 for shipment prior to October 1, 1975 at our convenience. While we have reserved the right to ship at our convenience, every effort will be made to ship on or near the date you specify on your order. Orders accepted under dating terms will be entered under terms of 2% November 10, net November 30, 1975. Additional discounts will be allowed in the form of anticipation for early payment in accordance with the following schedule:

Payment Date	Anticipated Discount
April 10	9.00%
May 10	8.00%
June 10	7.00%
July 10	6.00%
August 10	5.00%
September 10	4.00%
October 10	3.00%
November 10	2.00%
November 30	NET

Dating terms are in lieu of the usual 2% cash discount. Maximum discount that can be earned is 9.00%. Also, please note these dating terms are based on the current cost of money and may fluctuate with that cost.

Special Fall Terms:
In order to help you maintain a balanced inventory during the hunting season, we hereby offer the following on stock orders:

Month of Shipment	2% Discount	Net
October	December 10	January 31
November	January 10	February 28
December	February 10	March 31

The actual time of arrival of merchandise at destination shall have no effect on terms applicable to invoice payment. The postmark on the remittance envelope will be the deciding factor in ascertaining allowable discount.

Payment

The averaging of invoice dates is not permitted. Payment to be made in New York funds or equivalent. Interest on overdue accounts will be at the rate of 12% per annum. In addition, a service charge of 1/2% per month will be assessed on overdue accounts, to offset clerical and administrative costs. Orders for loaded ammunition received and accepted by us which do not qualify under dating terms will be subject to our regular terms.

Price Guarantee

We will guarantee against our own decline in prices until December 31, 1975, the unsold portion of purchases from us of our ammunition during the period of January 2, 1975 to December 31, 1975, which may remain on hand in the wholesaler's stock and unsold on the date of such decline. This guarantee will not apply to any reduction in the U.S. Excise Tax, nor will it apply to any reduction made in order to comply with requirements of the Price Commission.

Shipping Points and Procedure

All shipments of ammunition will be made F.O.B. our Factory at Alton, Illinois, freight prepaid. TITLE AND RISK OF LOSS TO PASS TO PURCHASER AT POINT OF SHIPMENT. All claims must be filed by the Distributor. All Bills of Lading will be marked with the following instructions - "Diversion or reconsignment of this shipment not authorized without consent of shipper." If the buyer selects or directs us to use a freight routing having a higher rate than the lowest published rate of satisfactory means of transportation, we will bill the buyer the difference between the published rate and the rate of requested routing.

Returns

Absolutely no product covered by this terms letter may be returned without the express permission of our Customer Service Department. Claims will not be allowed unless reported within 10 days of receipt of goods. Merchandise authorized to be returned must be in new original factory packaging. A 10% restocking charge will be made on items of a nondefective nature upon which we authorize the return.

Service Charge

Shipments less than the carrier's minimum charge are subject to additional charges.

Other Conditions

All orders are subject to approval and acceptance at the offices of the Corporation at Alton, Illinois, and all orders are subject to the further approval of our Credit Department on date of shipment.

Split case orders will not be accepted.

There shall be no liability for failure to perform any or all of our obligations herein stated if such failure is caused by strikes, labor troubles, fire, flood, accidents, wars (domestic or foreign), riots, civil commotions, sabotage, Acts of God, or the public enemy, explosion, embargo, or orders or directives of any Governmental authority having jurisdiction over us, or all other acts beyond our control.

Rights of Distribution

We have the right and privilege to select and appoint distributors of our own choice. This is a valuable right that must be recognized at all times. We do not recognize any right of the distributor to select and appoint sub-distributors.

Law Enforcement Allowance

On all orders supported by evidence of Federal Excise Tax Exemption, a 5% discount will be allowed after the 11% Federal Excise Tax is deducted. This discount will be issued as a credit.

Drop Ship and Less Than Fifty Case Orders

For those distributors who use our popular Drop Ship Program and other distributors that order less than 50 cases per order, we offer the following price schedule based on the number of cases ordered.

The total case quantity may consist of center fire pistol and revolver, center fire rifle, and rim fire cartridges.

Pricing:

Number Cases	Price	Handling Charge
50 or more	Published Carload Delivered	None
40 to 49	Published Carload Delivered	Add 1%
30 to 39	Published Carload Delivered	Add 2%
20 to 29	Published Carload Delivered	Add 3%
10 to 19	Published Carload Delivered	Add 4%
5 to 9	Published Carload Delivered	Add 5%
1 to 4	Published Carload Price Plus Actual Freight Charges	

Prices and handling charges are based on shipment within adjacent 48 states.

Terms of Payment

Each drop shipment will be invoiced separately. Customer may pay early and anticipate each invoice separately according to our 1975 ammunition dating schedule.

Shipping

Shipments will be made by common carrier (no rail shipments).

Order Numbers

Each drop shipment must be assigned a specific order number.

We trust you will use our Drop Ship Program to increase profits and reduce warehousing expenses.

December 1, 1974

TO: S & W AMMUNITION COMPONENT DISTRIBUTORS

ATTENTION: AMMUNITION BUYERS

SUBJECT: 1975 S & W AMMUNITION COMPONENT TERMS OF SALE

Gentlemen:

Enclosed is our Distributor Net Price List quoting S & W/ Alcan Ammunition Reloading Components.

Price Policy

The terms, prices, and other conditions of sale mentioned in this letter are subject to change without notice, and any new prices and terms which we may announce hereafter will apply to any unshipped portion of your orders on file with us at the date of such change.

Terms

All remittances for ammunition component products except powder shall be made on a rolling anticipation discount basis as follows:

Payment Date From Date of Invoice	Discount Allowed
30 Days	8%
60 Days	6%
90 Days	4%
120 Days	2%
150 Days	NET

Terms for powder are stated in the December 1974 Price List.

TRADE MARK REG. U.S. PAT. OFF.

THE MARK OF QUALITY

Anticipation discount terms are in lieu of the usual 2% cash discount. Maximum discount that can be earned is 8%. Also, please note these anticipation discounts are based on the current cost of money and may fluctuate with that cost.

The actual time of arrival of merchandise at destination shall have no effect on terms applicable to invoice payment. The postmark on the remittance envelope will be the deciding factor in ascertaining allowable discount.

Payment

The averaging of invoice dates is not permitted. Payment to be made in New York funds or equivalent. Interest on overdue accounts will be at the rate of 12% per annum. In addition, a service charge of 1/2% per month will be assessed on overdue accounts, to offset clerical and administrative costs. Orders for ammunition components received and accepted by us which do not qualify under dating terms will be subject to our regular terms.

Shipping Points and Procedure

All shipments of ammunition components will be made F.O.B. our Factory at Alton, Illinois, freight prepaid on the following:

A. Powder - Due to shipping regulations, orders for 100 pounds NET weight of powder will be prepaid. (Smokeless powder shipped as a "FLAMMABLE SOLID" is limited to 100 pounds net weight per truck and Bill of Lading. The I.C.C. regulations permit us to ship 100 pounds net, or less, of smokeless powder as a "FLAMMABLE SOLID" by motor truck or by REA Express. Powder orders to be shipped as "FLAMMABLE SOLID" must be ordered in standard case quantities only. Since "FLAMMABLE SOLID" shipments are limited to 100 pounds maximum net weight of powder per shipment, orders in excess of 100 pounds will be handled on multiple Bill of Lading.

B. Primers - Orders for 100,000 primers or more will be prepaid.

C. All other components require an order of 200 pounds or more to qualify for freight prepayment.

TITLE AND RISK OF LOSS TO PASS TO PURCHASER AT POINT OF SHIPMENT. All claims must be filed by the Distributor. All Bills of Lading will be marked with the following instructions - "Diversion or reconsignment of this shipment not authorized without consent of shipper." If the buyer selects or directs us to use a freight routing having a higher rate than the lowest published rate of satisfactory means of transportation, we will bill the buyer the difference between the published rate and the rate of requested routing.

Returns

Absolutely no product covered by this terms letter may be returned without the express permission of our Customer Service Department. Claims will not be allowed unless reported within 10 days of receipt of goods. Merchandise authorized to be returned must be in new original factory packaging. A 10% restocking charge will be made on items of a nondefective nature upon which we authorize the return.

Service Charge

Shipments less than the carrier's minimum charge are subject to additional charges.

Other Conditions

All orders are subject to approval and acceptance at the offices of the Corporation at Alton, Illinois, and all orders are subject to the further approval of our Credit Department on date of shipment.

Split case orders will not be accepted.

There shall be no liability for failure to perform any or all of our obligations herein stated if such failure is caused by strikes, labor troubles, fire, flood, accidents, wars (domestic or foreign), riots, civil commotions, sabotage, Acts of God, or the public enemy, explosion, embargo, or orders or directives of any Governmental authority having jurisdiction over us, or all other acts beyond our control.

Rights of Distribution

We have the right and privilege to select and appoint distributors of our own choice. This is a valuable right that must be recognized at all times. We do not recognize any right of the distributor to select and appoint sub-distributors.

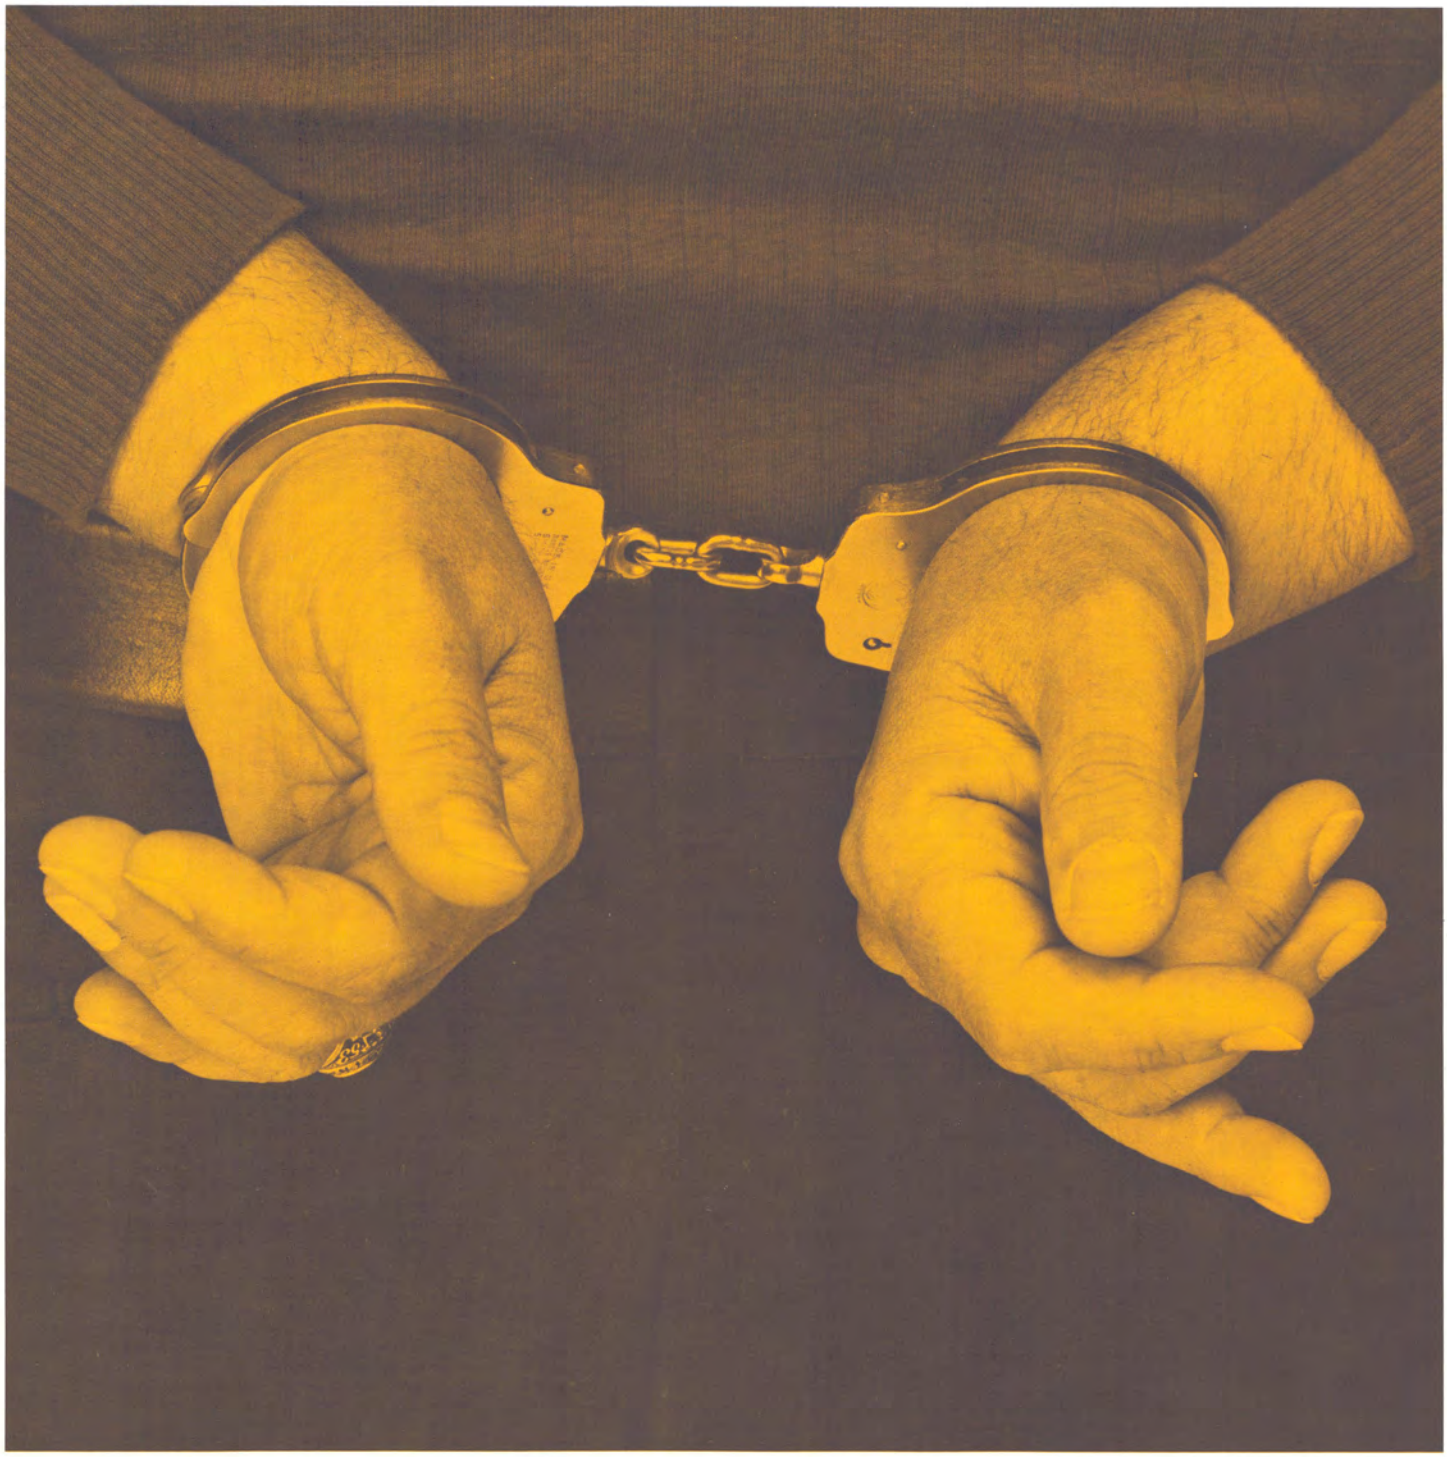
Handcuffs and Restraints



Handcuffs and Restraints

Handcuffs

Smith & Wesson offers five handcuff models, all designed and manufactured with quality as the primary consideration. There are no sharp corners to cut wrists or cause wear on clothing. And these handcuffs are made for both right and left hands so they may be used with both key holes away from the body of the offender.

All S&W chain and single tooth handcuffs are made to meet or exceed Military Specifications. They feature welded chain and cheek construction, heat treated internal parts for ruggedness, durability and maximum strength. Smith & Wesson handcuffs incorporate the use of a tempered steel flat spring that minimizes the chance of picking the cuff. A double locking feature and multiple position locking make S&W handcuffs secure and reliable.

The rotary, swing-through design of the jaw allows cuffs to be pressed smoothly and quickly onto the wrists of the prisoner, also prevents accidental locking. Maximum security cuffs feature a double tumbler lock and a sectioned locking bolt that makes picking almost impossible.

Of importance to police officers in night combat situations is the fact that the satin finish of S&W cuffs reflects less light than highly polished handcuffs.

Description	Weight
Model 90, regular finish blue or nickel	8⅝ oz.
Model 91, polished nickel	8⅝ oz.
Model 926, Airweight® polished	3¾ oz.
Model 938, stainless steel	8½ oz.
Model 94, maximum security regular nickel finish	12¼ oz.

Belly and Lead Chains

Smith & Wesson belly and lead chains are designed and manufactured in strict adherence to military and police specifications. All elements are made of special, heat-treated steel and nickel plated, with chains, rings and cuffs all welded together for maximum strength and security.

Smith & Wesson offers two belly chain models. Model 800 has cuffs separated to allow concealment and limited movement with parallel handcuffing. Unit also permits cross arm application for closer restraint.

Model 810 has both cuffs linked to the front center of the chain to keep the prisoner's hands together, in front and visible.

S&W lead chains are available in standard, five foot length with either one (Model 830) or two (Model 820) S&W Model 90 handcuffs.

Both belly and lead chains are also available with Model 94 maximium security cuffs and with chains of various lengths to meet the needs of the user.

Handcuff Cases

S&W offers the choice of three top quality handcuff cases. All fit 2¼ inch belts. Model B69 is a lightweight leather case that fits all style cuffs. One cuff tucks into the trouser waistband while the other fits securely in the case. Model B70, available in leather and Clarino®, for regular cuffs and Model B71 for maximum security cuffs hold both cuffs behind a leather flap that snaps securely in place.

Smith & Wesson

Leather Products

SMITH & WESSON
A BANGOR PUNTA COMPANY

Since their origin in 1969, the Smith & Wesson leather products have become one of the major factors in the Leathergoods market. Our increased sales in each of these four years is directly attributable to our satisfied customers.

In 1969, the Smith & Wesson Leathergoods line consisted of approximately 100 basic items. Today's products number over 300 items which are produced in a facility over three and one-half times as large as the original. Your requirement for quality products at a fair price has stimulated our expansion and we trust will continue to do so. This current Smith & Wesson holster catalog represents a continuation of both the Police Duty and Off Duty product lines as well as the Outdoorsman group and accessory products. The "Blazer" Holsters, for example, now accommodate almost three times as many handgun models as they did in 1972. The "Sportsman" Holsters now accommodate over 60% more handgun models than they did in 1972.

Assuming that we continue to justify your support, 1974 will show continued expansion. New products are already scheduled in each of the basic product lines which are presented as Duty, Off Duty, and Outdoorsman for your convenience in selecting just the right style for your holster needs. Please note that some holsters appear in more than one basic category. We feel that some holsters cannot be classified exclusively as Duty or Off Duty because many hunters want safety or quick draw features which may be especially prominent in the Duty or Off Duty lines.

Please give special attention to the new accessories which appear for the first time in this catalog. Dress and sports belts have a new look in addition to the comfort you've come to expect from Smith & Wesson.

Despite the incredible increases in leather costs, the Smith & Wesson line continues to be moderately priced and at no sacrifice in the quality you've always received in your Smith & Wesson products. Top grain cowhide is carefully molded into a hand polished and hand fitted quality holster, perfectly suited to your handgun. Compare Smith & Wesson leather, you'll see the difference. We have found that the highest quality leather, while also the most expensive, is not necessarily the costliest. The best grades of leather work the easiest and have less waste and less cost in the long run.

You can look to Smith & Wesson for innovative designs as witnessed by the new Model 39 Hide-a-Holster™ and the new Model B34 Combat Holster. In new materials, Clarino combines the satin gloss finish and the extra durability of a synthetic with the ruggedness and true form of leather. The constant addition of new equipment and new processes enable us to maintain Smith & Wesson quality and Smith & Wesson fair prices.

Any quality hunting or general sporting goods store, through their Smith & Wesson distributor, can supply the Smith & Wesson holster of your choice on short notice. Our expanded facility allows us to increase our inventory and provide faster service. Please use the Holster Reference Chart in this catalog to identify the Smith & Wesson holster model number which precisely describes your selection – this will help us deliver your holster faster.

Thank you for your continued support.

HOW TO ORDER YOUR S & W HOLSTER

To be assured of receiving the holster you want please order by our part number. A typical holster no. is illustrated below for a Smith & Wesson Model 19, 2½" barrel;

STEP 1 "B" — for black holster — leave **blank** for russet color
STEP 2 2 digit style numbers found by each holster picture
STEP 3 2 digit model numbers for barrel length (see holster reference chart)
STEP 4 — leave **blank** for plain, "W" — basket weave, "C" — flower carved

B	02	–	32	W

If left hand is desired please specify. If brass hardware is desired please specify. Orders not specifying hardware finish will be shipped in nickel. No extra charge for left hand holsters.

DUTY HOLSTERS

SMITH & WESSON LEATHER PRODUCT TERMINOLOGY

BELT LOOP size determines the maximum width of the belt. There are two major types; sewn, which requires the removal of the belt to put on the holster, and the snap-on belt loop as available in SMITH & WESSON MODEL B29 which snaps over the belt.

BELT TAB is a metal reinforced piece of leather that slides behind the belt like our Model 35 and 37. It is held in place by body pressure or a securing snap.

BODY WELT is a sign of quality. The welt is used to allow exacting fit of the handgun and to prevent exposure of and strain on the thread inside the holster.

BREAKAWAY FRONT DRAW is a design feature that allows the revolver to be drawn forward as evidenced in our Model 28.

CANT is the angle at which the holster rides.

CONCEALED SWIVEL reduces glare and protects the revolver from catching on the swivel when drawing. Our Models B29, B30, and B33 incorporate this design feature.

CLIP belt loop attaches to the belt by means of a metal clip which locks in position like the Smith & Wesson Model 09.

FALSE SNAP is used to discourage any unauthorized person from removing a gun from the holster. This feature is on our Model B27.

FULL FLAP gives protection to the revolver from the weather.

HAMMER PROTECTOR is designed to prevent the hammer from catching on clothing when the revolver is in the holster.

HARNESS is the securing device for most shoulder holsters. It can be made of leather or nylon webbing or both for comfort.

LINED HOLSTER is a holster which is lined with a softer leather for the protection of the gun like the Smith & Wesson Model 22.

LOCKING SWIVEL can be locked in one position or released to swivel when wearer rides in a car. See our Model B16.

METAL PLATE is used to reinforce the leather to conform to contour of hip and hold its shape.

PLASTIC INSERTS are used in cartrdige boxes for easy access. No more hang ups when you need to reload fast.

PLUGGED BOTTOM HOLSTERS are designed to prevent dirt from entering the bottom of holster, to reduce the overall length of the holster, and to protect the end of the revolver barrel.

SIGHT PROTECTOR is a design feature to shroud the front sights on handguns when carried in the holster.

SLIDING DEES "break away" if shoulder strap is grabbed during a scuffle.

STITCHING — All stitching is "lock stitch" saddlery type with best available waxed linen or nylon thread.

TENSION SCREWS are used in the Smith & Wesson Model 25. Their function is to adjust the tension of the holding spring built into the holster.

TRIGGER GUARD is a design feature of two types. The open trigger guard exposes the trigger for easy access and the covered trigger guard prevents access to the trigger until the gun is partially removed from the holster.

quad-lite L 24 & duo-lite L 20

REVOLVING BEACONS

Incorporate practicality with modern styling

Revolving Beacon Lamps represent the ultimate in visual warning system practicality. By combining a heavy guage polished, stainless steel base with a one piece acrylic dome, Lights offer extreme reliability and increased long life.

The heavy guage stainless steel base resists staining, flowering and rusting regardless of weather or pollutant conditions. The durable, one piece molded acrylic dome is modern in appearance and cuts wind resistance to a minimum.

Revolving Lamps utilize powerful sealed beam lamps which deliver maximum visual effectiveness in any weather. Heavy duty bronze contact springs insure totally dependable electrical connections to the lamps.

An enclosed motor, coupled to a sealed gear box provides quiet, efficient operation. The drive shaft is mounted on a long life Nylon bearing. A slip clutch eliminates the possibility of damage to gears. There are no drive belts to break or replace.

Smith & Wesson Electronics Co.

Revolving warning lights for safety... built to deliver outstanding performance

Beacon Lamps require a minimum of maintenance. Sealed beam lamps can be replaced in minutes and are easily obtainable at most auto supply houses.

Beacon Lamps are available in two versions. Model L 24, *Quad-Lite* contains four revolving sealed beam lamps. Model L 20, *Duo-Lite* contains two lamps. Clear lamps are supplied as standard equipment, however, red or blue beams are available for use with a clear dome.

Beacon Lights are available in a variety of colored domes . . .

quad-beam L 28 & L 29

REVOLVING WARNING LIGHTS

Combine compact size with heavy duty features

The QUAD-BEAM Revolving Warning Lights have been designed primarily for those vehicles which require an effective, compact visual warning device at low cost. QUAD-BEAM is available in two models— a permanent mount version and a magnetically mounted type.

Both models feature a heavy guage stainless steel base which will not stain, flower or rust. The dome is one piece acrylic and is available in a variety of colors. A single, high intensity light bulb centered behind four revolving lenses creates an impressive warning light. In case of damage, lenses are easily replaced. Delrin gears provide dependable, quiet operation. There are no drive belts to break or replace.

QUAD-BEAM L 28 is the permanent mount version which can be mounted on a light bar or, if desired, directly to vehicle roof. On-off switch is included.

The QUAD-BEAM L 29 Magnetic Base Light can be mounted in seconds. Unmarked police cars can now have the advantage of a visual warning system at a moment's notice. Operating power is provided by the vehicle battery simply by plugging into the cigarette lighter socket.

Smith & Wesson Electronics Co.

quad-beam delivers 100 impulses per minute

Quad-Beam offers these necessary features

- ☐ Positive gear drive
- ☐ Heavy guage stainless steel base
- ☐ Bulb burns base down for longer life
- ☐ Four specially designed Fresnel lenses produce maximum sharpness and clarity
- ☐ Vacuum type base gasket insures a watertight seal
- ☐ Includes 10 foot power lead

strobe-lite L-30 WARNING BEACON

High Intensity Without Moving Parts

The Smith & Wesson Electronics L-30 High Intensity Warning Light produces over 1,000,000 candlepower of light output, which is approximately four times as much light intensity as that produced by most Rotating Beacons. The source for this high intensity flash is a long-life Xenon Flash Tube. There are no moving parts in the L-30 Warning Light. The brilliant flash of the Xenon Flash Tube is coupled through an optically correct 360° Fresnal Lens which delivers excellent visual effectiveness regardless of weather conditions.

The main thrust of the light energy is directed down the highway while a small amount is allowed to come out of the top of the L-30. This upward light radiation can be pinpointed by surveillance helicopters or airplanes, thus allowing instantaneous pinpointing of emergency situations.

The long-life L-30 features a universal mounting base which is designed for permanent installation. The unit may be mounted directly to the vehicle roof, a light bar, or pipe-mount.

Smith & Wesson Electronics Co.

High Intensity–Low Power Drain

The L-30 STROBE-LITE operates on less than 3 amperes, or about one-third the power necessary to drive a conventional rotating beacon. This low power drain is extremely important on some of todays emergency vehicles which contain a great deal of electrical equipment operated from the vehicle battery.

Two L-30 STROBE-LITES may be connected for synchronized wig-wag operation. The power drain of the two units will still be less than that of a conventional two-lamp rotary beacon.

The L-30 STROBE-LITE is a one-piece, self-contained Unit. It does not require a separate remotely located high voltage power supply. The long life Xenon Flash Tube has a plug-in radio tube type base which allows it to be changed in a matter of minutes.

Smith & Wesson Electronics guarantees the L-30 STROBE-LITE against defective parts and workmanship for a period of one year.

volunteer I & II WARNING LIGHTS

The perfect "official" visual warning device

The VOLUNTEER Emergency Warning Light is the answer for volunteer firemen and auxiliary policemen who need a visual warning light for their private car.

A compact and powerful emergency lamp, the VOLUNTEER Light can be magnetically or permanently mounted on the dashboard. The unit comes complete with steel plate for magnetic mounting and mounting pad for permanent installation. Operating power is provided from the vehicle battery by way of the cigarette lighter socket. The unit is equipped with cigarette lighter plug and ten feet of wire.

The VOLUNTEER Light is offered in both a revolving reflector type or fixed flashing version. A slip-on partial cover is provided with the revolving model to shield the high intensity light from the driver's eyes. Both models utilize a light reflector made of Alzac which will not tarnish. The light source is a 50 candle power bulb that burns base down for maximum life.

Positive gear drive provides dependable, quiet operation. There are no drive belts to break or replace.

The durable one piece acrylic dome is available in a choice of colors—Red, Amber, Blue, Green and Clear.

magnum III ELECTRONIC SIREN

Powerful basic siren system offering complete effectiveness

The MAGNUM III is designed for those vehicles requiring siren only or for those needing a second siren warning device. The MAGNUM III couples total effectiveness with absolute dependability at relatively low cost. Operation is uncomplicated. Color-coded push buttons clearly designate Siren Tones enabling quick and accurate selection.

The MAGNUM III features the popular "Wail" and "Yelp" tones. In addition, a "Manual" button allows operation of the unit as a mechanical siren. When the Manual button is pressed, the siren "winds up" and similarly "winds down" upon button release. Each of these signals adequately provides warning of up to several hundred feet.

The MAGNUM III may be operated as a back up siren or in conjunction with a main siren for increased penetration often needed at locations such as intersections.

A fully illuminated Control Panel lessens the possibility of error during night operation. However, a special light switch permits the Control Panel illumination to be turned off should the need arise. Completely transistorized, the Siren Amplifier assures instant response at any temperature. Installation is made easy. All leads simply connect to a convenient terminal strip doing away with complicated and hazardous wiring. The Siren may be operated by horn ring or foot switch.

Smith & Wesson Electronics Co.

magnum III is small enough for glove box concealment

Unmarked vehicles may remain "unmarked" by installing the MAGNUM III in the glove box and a model S/S-3 speaker behind the vehicle grill.

magnum IV ELECTRONIC SIREN

Combine Electronic Siren and Public Address System into one unit

The MAGNUM IV does away with complicated operation by combining Electronic Siren, Public Address System and Police Radio Amplification into one complete, centrally located unit. Color-coded push buttons distinctly label function modes enabling quick, positive selection.

In addition to all the standard Electronic Siren signals, the MAGNUM IV features an extremely clear Public Address System which instantly overrides Siren when needed. Incoming radio calls may be amplified through the Siren Speaker providing complete and effective communication. If desired, an optional second speaker can be added thereby doubling the sound power.

A fully illuminated Control Panel lessens the possibility of selection error during night operation. A special light switch, however, allows the Control Panel to be turned off if need be. Completely transistorized, the amplifier assures instant response at any temperature. Installation is made easy. All leads simply connect to a convenient terminal strip eliminating hazardous wiring. Siren may be operated by foot switch or horn ring.

Smith & Wesson Electronics Co.

magnum IV offers all important features

Easy push button operation

Push buttons for these functions

RADIO—*Amplifies Police radio through Public Address System.*

WAIL—*Steady rising and falling tone simulating mechanical siren.*

YELP—*Rapid cycling wail.*

P.A.—MANUAL—*Activates Public Address System or enables operator to sound siren manually.*

Built for dependable performance

magnum V ELECTRONIC SIREN

Deluxe siren system with versatile features

The MAGNUM V incorporates Electronic Siren, Public Address System and Police Radio Amplification into one centralized unit eliminating complicated operation. Color-coded push buttons clearly distinguish operating modes enabling proper selection at a glance.

All the standard Electronic Siren Tones, including the European Hi-Lo, are featured, as is an intensely clear Public Address System. Incoming radio calls may be monitored through the Siren Speaker providing total communication effectiveness.

The MAGNUM V may be used with either one or two microphones allowing police radio and Public Address System to be operated simultaneously, or if desired, one microphone to operate both systems separately. An internal Selector Switch allows the use of either carbon or magnetic type microphones. A special Noise Cancelling microphone is available. This microphone is designed to block out background noise and increase Public Address System volume.

The possibility of error during night operation is lessened due to a fully illuminated Control Panel, however, a special light switch permits illumination black out. Installation is made easy. All connections are plug-in type doing away with complicated and dangerous wiring. Siren may be operated by foot switch or horn ring.

Smith & Wesson Electronics Co.

magnum V allows choice of microphone

Available Optional Microphones

Magnetic Microphone provides greater clarity than standard carbon microphone

Noise Cancelling Magnetic Microphone virtually eliminates back-ground noise

Designed for Long Life

magnum VI ELECTRONIC SIREN

Incorporate all warning system controls into one easy to operate unit

The MAGNUM VI, by combining Electronic Siren, Public Address System and Accessory warning light controls into one package, represents the ultimate in emergency vehicle-warning systems. This one centralized unit is capable of operating every emergency warning function with the touch of color-coded buttons.

Versatile, this single device combines all the standard Electronic Siren signals plus the European Hi-Lo, and an extremely clear Public Address System so important to today's modern law enforcement agency. The MAGNUM VI permits incoming radio calls to be monitored through the Siren Speaker enabling total communication efficiency.

In addition, Accessory Switches control revolving beacon lights, brake and back-up light cut-out and electric gun or trunk lock.

The Control Panel is fully illuminated, thereby lessening the possibility of error during night operation. Bright, selection Indicator Lights denote which function is in use. A special Light Switch allows the MAGNUM VI Control Panel illumination to be blacked out if desired. Installation is made easy. All leads simply plug-in with a minimum of effort eliminating complicated and dangerous wiring.

Smith & Wesson Electronics Co.

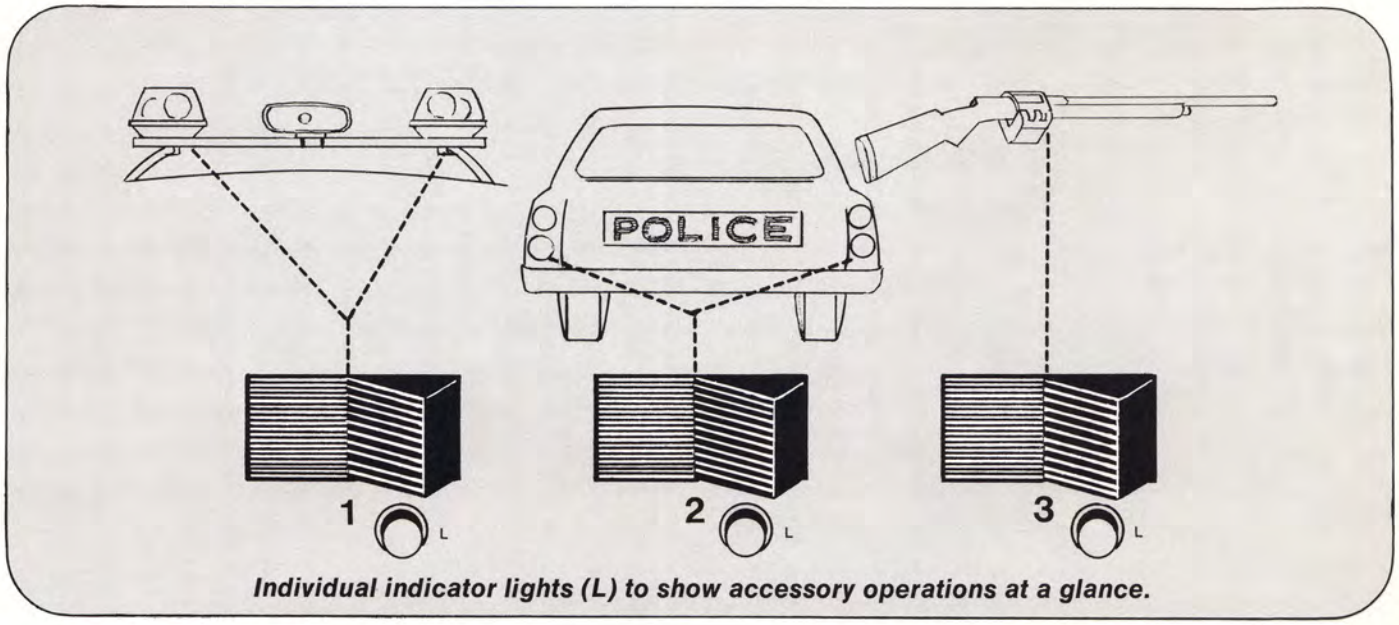
magnum VI eliminates dangerous and complicated wiring

Typical Accessory Switch Wiring

SW-1 . . . controls rotating beacons and wig-wag lights (Flasher supplied).

SW-2 . . . controls brake lights and back-up lights.

SW-3 . . . controls electric gun lock, or trunk lock.



Individual indicator lights (L) to show accessory operations at a glance.

Built For Rugged Performance

Switches—Two position rocker type, 15-amp contact ratings
SW 1 and SW 3:—single pole—single throw
SW 2 Two Section: First section:—Single pole, single throw. Second section:—Single pole, double throw.
Switch connections—Quick connect plug-in type.
Flasher—Three terminal wig-wag type.
Fuses—15 amp: for siren. 30 amp: for accessories.
Mounting bale—Speeds installation.
Microphone—Use two-way radio microphone. Or order optional dynamic, or noise cancelling microphone with unit.
Sound output—118 db @ 10 feet with one speaker.
Output impendance—11 ohm.

high power loudspeakers

Designed to Fulfill Any Sound Requirement

Smith & Wesson Electronics manufactures only the finest quality High Intensity Loudspeakers for use with electronic siren and public address systems. All Smith & Wesson Loudspeakers have been designed to deliver increased sound power over that of conventional reentrant speakers. By using a high intensity sound driver, Smith & Wesson Speakers provide full range sound power over long distances and easily overcome high surrounding noise levels.

Because of their high power rating, Smith & Wesson Loudspeakers have a broad range of applications. Engineered primarily for those vehicles having electronic siren system and/or public address facility, Smith & Wesson Speakers are equally effective in such applications as air-to-ground and ship-to-coast communications.

All vital parts of Smith & Wesson Speakers are completely weather proofed assuring reliable performance regardless of weather or pollutant conditions. Installation is made easy. Speakers are furnished with hardware for fender or roof mounting. Hardware is also included for mounting on Smith & Wesson light bars.

Smith & Wesson Electronics Co.

top speaker performance

S/S-1C The S/S-1C Chrome Plated Loudspeaker combines high styling with full range high intensity sound. Ideal for use with electronic siren and public address system amplifier. Designed for outside mounting, this speaker is especially practical in areas where high corrosive pollutants are prevalent.

Height	7½″	Finish	Chrome plated
Width	7¼″	Weight	7 pounds
Depth	6½″	Power rating	75 watts

S/S-4 The S/S-4 Chrome Plated Loudspeaker features traditional appearance with high intensity sound output capabilities. Easily mounted on fender or car top, this speaker provides that extra mark of distinction.

Height	8½″	Finish	Chrome plated
Depth	10½″	Power rating	75 watts
Width	8″	Weight	9 pounds

Chrome Plated Speakers are manufactured of copper, nickel and chromium plating — the most durable outdoor finish available.

S/S-1 Extremely compact for universal use, the S/S-1 mounts easily on fender, behind the grille or roof top. Special horn shaped design provides perfect full range sound pattern for both electronic siren and public address system operation. Gray baked enamel finish guards against corrosion enabling such applications as aircraft and sea vessel installation.

Height	7″	Finish	Gray baked enamel
Width	7″	Weight	6½ pounds
Depth	6½″	Power rating	75 watts

S/S-2 The S/S-2 Loudspeaker has been engineered especially for roof top mounting. Although larger in over all size, this high intensity speaker design provides wide horizontal sound dispersion with low wind profile and minimum beacon light obstruction. Gray baked enamel finish protects against corrosive pollutants.

Height	5½″	Finish	Gray baked enamel
Width	14″	Weight	7½ pounds
Depth	11½″	Power rating	75 watts

S/S-3 Designed for tight, behind the grille or fender well mounting, the S/S-3 is particularly well suited for unmarked vehicle applications. Although concealed, this speaker delivers the same high intensity sound of outside mounted speakers for total electronic siren and public address system effectiveness.

Height	10″	Finish	Gray baked enamel
Width	5¼″	Weight	8 pounds
Depth	5″	Power rating	75 watts

our electronic sirens assure top speaker performance

III

NOW for the men who must be heard, siren/ public address systems to match your exact needs. The powerful Magnum III — with siren only. The Magnum IV — with wail or yelp siren plus standard PA and two-way radio amplification. The Magnum V — with the features of the Magnum IV plus Hi-Lo siren and handy single-mike operation of both radio and PA system. The Magnum VI — that has the advantages of the Magnum V plus three handy, auxiliary switches that can be wired to control almost anything on your vehicle. (Roof lights, brake lights and gun-lock, etc. — you pick your own combination.)

IV

NOW you can have the advantages of lighted, color-coded push button control. This helps you keep your eyes on the road; a quick glance is all you need. And it eliminates the unwanted "burps" and "yelps" you used to get with rotary selector switches. The panel light switches off any time you want.

V

NOW you will have a PA system that lets you be heard and understood. The Magnum IV, V, and VI are truly high-fidelity. They're designed to give you better clarity than other mobile units now available. Plus a choice of five different speakers for exposed or behind-the-grill mounting.

VI

NOW is the time to learn more about our Magnum line.

Smith & Wesson

Marine Safety Equipment

Marine Safety Equipment

Nothing is more precious than human life. That's why Smith & Wesson has developed a line of safety equipment for the marine industry.

Years of pyrotechnic experience and development efforts stand behind each and every piece of Smith & Wesson marine safety equipment. Starting with materials manufactured to rigid S&W specifications, each flare and smoke signal, each line thrower is crafted by dedicated people who realize that lives depend on the quality of their work.

Distress signals are as vital to marine safety as life preservers. There is Smith & Wesson marine safety equipment for every vessel, from pleasure boats to commercial ships. Make sure they're aboard the next time you leave your dock or mooring.

Project-A-Flare Emergency Signals

Small, compact and powerful, Smith & Wesson Project-A-Flare emergency signals are the most advanced medium range aerial flares available. With 12,000 candlepower, they are powerfully bright and highly visible day or night. The flare is propelled to an altitude of 300 feet. The rustproof metal projector unit features a spring-driven striker to assure firing of the flare in even the worst weather. Completely weatherproof, Project-A-Flare signals are designed for simple,one hand operation.

Project-A-Flare 8-Pak contains 8 red flares and projector in a weatherproof, pocket-sized plastic case (Catalog number 211). Flare refills are available in red, amber, and green.

Emergency Signal Kits

Smith & Wesson offers five emergency signal kits to meet the broadest range of marine safety needs. Kits are available with flares or smoke signals or both. Designed with sure grip, safe wooden handles, the bright red, hand-held 500 candlepower flares feature a two-minute burning time. The hand-held orange smoke distress signals burn for one minute.

- 3 hand-held red flares (Catalog number 237)
- 3 hand-held orange smoke signals (Catalog number 238)
- 3 hand-held red flares and 3 hand-held orange smoke signals (Catalog number 239)
- 3 hand-held red flares and 1 Project-A-Flare 8-Pak (Catalog number 240)
- 3 hand-held orange smoke signals and 1 Project-A-Flare 8-Pak (Catalog number 241)

S&W Hand Held, Rocket Propelled Parachute Flares

Smith & Wesson hand held, rocket propelled flares are available in red, for distress signal, and illuminating models. Incorporating the latest techniques in solid-fuel rocketry, these hand-held flares can be operated with confidence and safety. There is no black powder. The rocket launches with very little recoil. Firing is instantaneous with a simple, double action trigger mechanism. The rocket soars to an altitude of 1200 feet, burns at 30,000 candlepower for 40 seconds with no incandescent droppings.
(Catalog number 219—illuminating)
(Catalog number 220—red)

Illuminating Parachute Flare and 37 mm Flare Pistol.

Smith & Wesson also offers an illuminating parachute flare designed for use in the Smith & Wesson 37 mm flare pistol. The flare soars to an altitude of 400 feet and burns with 30,000 candlepower for forty seconds as it slowly parachutes back to earth. The Smith & Wesson 37 mm flare pistol is a rugged and dependable gun that is built on the frame of the largest and heaviest duty S&W revolver.
(Catalog number 225—37 mm illuminating flare)
(Catalog number 209—37 mm flare pistol)

Floating Smoke Signals

4-Minute Floating Orange Smoke Distress Signal.

The result of extensive development, this Smith & Wesson signal contains flotation material that maintains its upright position in the sea as it expels a dense cloud of orange smoke. Compact in design, the signal is just 7¼ inches high, 3¾ inches in diameter and weighs only 26 ounces. (Catalog number 217)

Smith & Wesson Lifebuoy Marker.

Utilizing the same flotation technique and reliable chemical formula, this marker is provided with a convenient mounting bracket. After ignition, the marker issues a cloud of dense orange smoke for a period of 15 minutes. Length is 26⅜ inches, diameter 5$\frac{3}{16}$ inches, and weight 16 pounds.

International Line Thrower

The S&W International Line Thrower is a solid fuel, rocket propelled device for accurately delivering a ¼ inch line a distance of up to 1200 feet. The line throwing kit consists of a launching gun, two line rockets with buoyant heads, two line rockets with non-buoyant heads, five ignition cartridges and four 400-yard buoyant polyolefin lines plus instructions and a cleaning kit. The kit is furnished in a rugged, wooden box that measures 27½ inches in length, 12½ inches in width, and 16½ inches high.

Signal Visibility Data

Theoretical Visibility Range is the maximum distance an object may be seen at sea according to both the height of the object and that of the observer's eye.

Theoretical Visibility Range in the adjacent chart is expressed in miles.

Height of Signal Above Water (Feet)	Height of Observer's Eye (Feet)									
	0	5	10	15	20	25	30	35	40	45
5	2.6	5.1	6.2	7.0	7.7	8.3	8.8	9.3	9.8	10.3
10	3.6	6.2	7.3	8.1	8.8	9.4	9.9	10.4	10.9	11.3
15	4.4	7.0	8.1	8.9	9.6	10.2	10.7	11.2	11.7	12.1
20	5.1	7.7	8.8	9.6	10.3	10.9	11.4	11.9	12.4	12.8

500	25.6	28.2	29.3	30.1	30.8	31.4	31.9	32.4	32.9	33.3
1000	36.3	38.8	39.9	40.7	41.4	42.0	42.6	43.1	43.5	44.0

Luminous Range

The distance that a distress signal can be seen depends upon various atmospheric conditions and the signal candlepower. The chart provides a fast reference for distance visibility of white light by both candlepower factor and weather conditions.

TO: Smith & Wesson Distributors

FROM: David G. Simons

SUBJECT: U. S. Law Enforcement Agency Requirements

Smith & Wesson takes this opportunity to again encourage its distributors to cultivate all parts of the law enforcement handgun market. In particular, we want to remind all distributors not to overlook the purchasing, service and warranty requirements of state and federal law enforcement agencies. These requirements deserve your attention and interest, the lack of which can have a detrimental effect on the agencies, as well as, Smith & Wesson's reputation.

To facilitate the efforts of each distributor interested in this type of business, to the extent reasonably possible, Smith & Wesson will give production scheduling priority to those orders which are designated to fill U. S. law enforcement agency handgun requirements. The original of the agency bid and purchase order must accompany the distributor's order to Smith & Wesson. Smith & Wesson will also attempt to expedite orders received on behalf of individual law enforcement officers provided the distributor's purchase order is accompanied by an original letter on department or agency stationery indicating the specific individual officer needs are for duty purposes. The department letter should be signed by a superior officer.

Since these law enforcement agencies also have, at times, very sporadic and irregular tax-exempt bid requirements, Smith & Wesson has developed a program which should permit all distributors with the requisite interest and service capabilities to respond to such requests. Under this program, an extra allocation of handguns will be made available to distributors. However, because our experience has caused us to be concerned about the availability of prompt and complete sales and service assistance to law enforcement agencies, minimum service requirements must be met to obtain the extra allocation of handguns.

Under the program a distributor will be allocated handguns over and above his normal monthly allocation provided he can demonstrate to Smith & Wesson's satisfaction that he meets the following requirements:

1. The distributor will require additional handguns to respond to a tax-exempt bid request from a single U.S. federal, state or local law enforcement agency. Quantities and schedules should be confirmed by each distributor prior to submission of his bid.

2. The additional handguns required exceeds 25% of the average number of handguns shipped to the distributor on a per-calendar-month basis. Such average number of handguns shall be calculated as 1/6 of the total number of handguns shipped against said distributor's normal allocation during the preceding six complete calendar months. Shorter periods will be used where six months experience is not available.

3. The distributor has and/or will provide the following sales and service assistance to domestic law enforcement bid customer:

(i) Solicitation visits by experienced and reputable salesman at the bidder's location of the advantages, operation, superior quality and handling, and the availability of accessories of handguns to be quoted.

(ii) A program of contacting each law enforcement agency or department purchasing handguns periodically during the warranty period to ascertain if any specific warranty or usage problems or requirements have arisen and to coordinate the handling of the customer problems with the factory in a manner which will reflect favorably on the factory and the distributor.

So long as Smith & Wesson's production schedules reasonably permit, this program will be available. It is further noted, all handguns delivered against individual or department purchase orders, or those bids and contract awards not meeting the minimum extra allocation requirements noted above will be supplied by the distributor from his average monthly shipment.

Again, Smith & Wesson encourages each distributor to aggressively cultivate all parts of the law enforcement market and to pursue U.S. law enforcement bid opportunities noted above if such business is commensurate with your business and service interests and capabilities.

SMITH & WESSON

January 10, 1975

PRICING POLICY

GOVERNMENT COMMITMENTS

HANDGUNS

As a matter of Company policy, Smith & Wesson charges prices prevailing at the time goods are shipped to its customer. Smith & Wesson's printed Price Lists carry this notification and further advise that prices are subject to change without notice.

However, from time to time Smith & Wesson has been requested to honor certain orders at prices prevailing at the time of order placement because of Government bidding practices. In these situations, our distributors, domestic and foreign, have been required to quote firm prices and delivery against fixed price Government bid and contract requirements, where the publicly funded contract, when and if awarded, often contains a penalty clause for failure to comply with its terms. Consequently, as partial relief for this problem, the following policy will prevail effective immediately.

POLICY

On domestic orders placed by authorized Smith & Wesson distributors to fill fixed price publicly funded federal tax exempt contract commitments where,

(i) Smith & Wesson has made a specific delivery commitment (as entered in Smith & Wesson's records) prior to the distributor's placement of an order with Smith & Wesson,

(ii) an executed and binding fixed-price contract has been awarded to said distributors (or to one of its dealers and the order is processed through said distributor) specifying delivery dates consistent with Smith & Wesson commitment, and

SMITH & WESSON

(iii) said fixed-price contract carries an official date stamp which in no event is later than fourteen calendar days after the effective date of the first price increase following the date on which Smith & Wesson made its delivery commitment (hereinafter called "Price Increase Date"),

Smith & Wesson will use its best efforts to ship said order in accordance with its delivery commitments and at prices prevailing on the date Smith & Wesson made its delivery commitment, provided further,

(iv) the total quantity of handguns ordered is shipped within three months after the Price Increase Date.

The limited relief available under this policy is offered subject to the understanding that it shall be the distributor's sole responsibility to coordinate Smith & Wesson's delivery commitment, the official contract date, and the availability and shipment of Smith & Wesson products. Full documentation of said order must be submitted to qualify under this policy.

A domestic order to fill an official Federal Government requirement, even though such requirement does not qualify for federal excise tax exemption, will be processed under this policy if such order otherwise meets the same conditions set forth above for domestic tax-exempt orders. Current federal regulations exempt only Defense Department supply contracts from federal excise tax. All other Federal Government agencies such as the F.B.I., Treasury, and Customs, must pay F.E.T..

A foreign order placed with Smith & Wesson to fill an official foreign government fixed-price contract will be processed under this policy, if said order otherwise meets the same conditions set forth above for domestic tax-exempt orders except that the official contract date stamp may be up to, but in no event later than, twenty-one (21) calendar days after the Price Increase Date.

SMITH & WESSON

All other orders, domestic or foreign will be processed under and pursuant to Smith & Wesson's established policy of charging the price prevailing on the date of shipment.

This policy is offered subject to Smith & Wesson's scheduling, shipping, production, and allocation practices and policies limiting the availability of Smith & Wesson products which may exist during the time the order is processed. Without liability to any person, Smith & Wesson reserves the right to modify, amend, or rescind this policy in writing at any time without prior notice.

TO: All Smith & Wesson Handgun Distributors

FROM: David G. Simons

SUBJECT: Law Enforcement Priority Orders

As I am sure you are aware, Smith & Wesson, for some years, has maintained in the public interest, a shipping priority for legitimate police DUTY handguns.

Subject to the terms of your distributor contract, this shipping priority is available to all distributors upon Smith & Wesson's receipt of a distributor's order (1) accompanied by the original of the department's or municipality's purchase order in the case of tax-exempt orders, or (2) accompanied by the original of a letter on department stationery, executed by the officer in charge indicating the DUTY requirements in the case of officers who may be required to purchase their own duty handguns. Orders for off-duty police handguns will be treated on a secondary priority basis provided the distributor's order is accompanied by the original of a properly executed letter on department stationery indicating the off-duty requirements.

Orders will be shipped tax-exempt only on Smith & Wesson's receipt of a properly executed Smith & Wesson affidavit (enclosed) or the original of a law enforcement agency or municipal purchase order committing City, State or County funds where ownership of the handguns will remain with the purchasing entity. No other type of documentation will be accepted as substantiation for tax-exempt shipments.

Please be advised, effective as of the date of this memorandum, that Smith & Wesson will no longer make available, on a law enforcement priority basis, handguns with barrel lengths in the excess of six (6) inches or target handguns such as the Model 41 and 52. All your current back orders for items that qualify per the above have been cancelled. Future orders, as well as,

continued.....

SMITH & WESSON

previous back orders for this type of handgun should be filled out of your normal stock shipments when received for your inventory since such handguns rarely are required as legitimate duty handguns.

Any legitimate tax-exempt police orders you wish to process that are contrary to the above policy should be directed to the undersigned for evaluation and consideration.
